

09/727,628  
Amendment A  
September 11, 2002

REMARKS

The claims have been amended to correct the informalities noted by the Examiner. No new matter has been added.

The Examiner noted that claims 3 and 6 were free of the prior art, given failure of the prior art to teach or suggest a nucleic acid of bases 7-2064 of SEQ ID NO:3 or comprising at least 200 bases of bases 7-2064 of SEQ ID NO:3. The amended claims all require a nucleic acid comprising at least 200 bases of bases 7-2064 of SEQ ID NO:3. It is therefore believed that the amendments overcome all of the objections and rejections raised in the Office Action.

Reconsideration is respectfully requested.

Respectfully submitted,

Donald R. Stuart
